

Cracking and collapsing of wind drifts in Wolverine

Wolverine Bowl

Bridger Range

1/24/2023

Code

L

Aspect

E

Latitude

45.83010

Longitude

-110.93400

Notes

Had some cracking, collapsing of wind drifts up high on the ridge today and few DLs running into Wolverine.

Winds were swirling, and coming from the south when I was skiing, but obviously the storm pattern is moving from the north.

Super wind scoured slopes from yesterday not bonding well in other places.
