

Hyalite Canyon

Date

Sun, 01/19/2025 - 12:00

Activity

Skiing

Aspect: East

Elevation: ~9000ft

Snow Depth: 155cm

Pit:

- 155-20cm 1F
- 20-0cm 4F/Fist
- ICT7 (Thin Crust layer at 135cm)
- ECTX

Snow:

- Wind affect up higher. Stayed out of bowl as our chief concern was triggering a wind slab loaded on the crust layer at 135cm. Did have shooting cracks at the top wind affected area. Great snow otherwise!

Region

Northern Gallatin

Location (from list)

Flanders Creek

Observer Name

David W.
